

xLM Solutions is Newest Reseller of InspectionXpert® and Office2PDM™

Raleigh, NC, March 18, 2010 – Extensible CAD Technologies today announced xLM Solutions has begun offering the InspectionXpert® product line and Office2PDM™ through their reseller program. With this agreement, xLM Solutions will sell and support InspectionXpert’s quality inspection productivity software and Office2PDM, an Enterprise PDM add-in for Microsoft Office documents.

“xLM Solutions works with companies across industries to more efficiently manage their data, reduce costs and increase productivity,” explains Marc Young, Partner, xLM Solutions. “Both InspectionXpert and Office2PDM help our clients achieve these goals.”

InspectionXpert helps manufacturers automate the creation of their First Article inspection packages by auto-ballooning inspection drawings and creating inspection forms—a critical need in AS9102 requirements for Aerospace and APQP requirements for Automotive industries, and important for medical device manufacturers, contract manufacturers and job shops as well. Office2PDM is an add-in for SolidWorks Enterprise PDM that makes it faster and easier to manage and revision control Microsoft Word, Excel and PowerPoint documents inside the EPDM vault. Office2PDM includes the EPDM Dashboard in Outlook that provides a real-time view of the status of workflows, states and transition dates to help manage vault data more effectively.

“We are pleased to have xLM Solutions as a part of our reseller program”, said Jeff Cope, President of Extensible CAD Technologies. “xLM’s technical expertise and consultative approach are important to ensuring more companies understand the value of InspectionXpert and Office2PDM to their critical business processes.”

About xLM Solutions

xLM Solutions is a 3D/PLM/PDM implementation and service company. xLM Solutions is unique in that it is actively managed by its owners all of whom are "hands on" in every aspect of the business and possess some of the best solution expertise in the industry .
